SUBJECT INDEX
VOLUME 45

Abelson murine leukemia virus
in vitro mutagenesis, 1028
reverse transcript P160 genomes cloned, 1195
site-directed deletions, 1028
Adeno-associated virus 2
nucleotide sequence and organization of genome, 555
Adenovirus type 2
cycloheximide stimulation of early transcription, 683
"i" leader, RNA segment, 185
33K protein, structure and location, 251
Adenovirus type 5
E1A region and cell growth cycle, 192
14K antigen in early region 4, 514
recombinants with SV40, 91
transformation of rat cells, 1107
Adenovirus type 12
cyt mutants, transformation of rat cells by, 1107
E1A gene, SV40 vector, monkey cells, 408
early region 1 expression transformed by recombinants, 1074
E1B gene, SV40 vector, monkey cells, 420
Adenovirus type 5-simian virus 40 hybrid
palindromic family of viruses, 91
Aedes albopictus cells
enucleated, Sindbis virus replication, 792
Sindbis virus replication, 792
Agnoprotein
SV40, subcellular localization, 428
AKR thymic lymphomas
mink cell focus-inducing murine leukemia virus proviruses, 576
Aleutian disease virus of mink
genome, characterization, 977
Autographa californica nuclear polyhedrosis virus
homologous DNA sequences in genome, 961
polyhedrin and 10K protein in infected cells, 215
transcripts in infected cells, 215
Avian endogenous retrovirus *ev*-2
compared to Rous-associated virus-0, 868
sequence of LTR and cellular sequences, 868
Avian myeloblastosis-associated viruses
major envelope glycoproteins compared, 233
subgroups A and B, glycoproteins compared, 233
Avian myeloblastosis virus
fifth major viral *gag* protein, p10, 648
gag protein p10, amino-terminal sequence, 885
homologous chicken DNA, 925
monoclonal antibodies to reverse transcriptase, 859
pp19, digestion, 876
protein pp19 peptide binding to viral RNA, 876
Avian retrovirus MH2
subgenomic expression of v-*myc*, 133
Avian RNA tumor virus
reverse transcriptase endonucleases, mechanism, 727
Bacteriophage ϕ29
morphogenesis and DNA-gp3, 383
Bacteriophage ϕ92
endo-*N*-acetylneuraminidase, 367
Bacteriophage λ
R-loops in *recA*-independent recombination, 971
Bacteriophage P22
restriction endonuclease cleavage site maps, 864
Bacteriophage PM2
ts1 mutant with defective capsid, 226
Bacteriophage T3
effect of *S. typhimurium* DNA restriction systems, 1147
ocr gene function, 1147
Bacteriophage T4
vegetative T4 DNA by electron microscopy, 813
Bacteriophage T7
effect of *S. typhimurium* DNA restriction systems, 1147
ocr gene function, 1147
stabilization and assembly, 665
Bacteriophage UC-1
new, with *E. coli tonA* as receptor, 700
Baculovirus
homologous DNA sequences in genomes, 961
Bovine leukemia virus
two species of covalently closed circular proviral DNA, 1172

Cell fusion
mediated by Sindbis virus glycoproteins, 1083
Chicken embryo fibroblasts
avian sarcoma virus-infected, particles from, 1207
Coliphage P1
morphogenesis, 1118
mutant morphology by electron microscopy, 1118
Corynebacteriophage ω_c^{tox+}
restriction endonuclease map, 524
Corynebacterium diphtheriae
corynebacteriophage ω_c^{tox+}, endonuclease map, 524
Coxsackievirus B3
temperature-sensitive mutants characterized, 1037
Coxsackievirus group B
membrane-bound virions, 832
c-*rel* gene
cellular homolog to reticuloendotheliosis virus oncogene, 104
Cyanogen bromide
digestion of avian myeloblastosis virus protein pp19, 876
Cycloheximide
stimulation of adenovirus type 2 transcription, 683
Cytomegalovirus
human, compared with *Herpesvirus aotus*, 715

Defective interfering particle
vesicular stomatitis virus, deletion in, 766
DNA-binding protein
HSV-1, gene analysis in temperature-sensitive mutants, 354
HSV-2, gene analysis in temperature-sensitive mutants, 343
HSV-2, maturation in temperature-sensitive mutants, 332
Duck hepatitis B virus
protein bound to viral DNA, 165

E1A region
adenovirus type 5, effects on cell cycle, 192
adenovirus type 12, SV40 vector, monkey cells, 408
Early region 4
adenovirus type 5, 14K antigen, 514
Early region 1A
adenovirus, mRNAs, 594
adenovirus, transcription initiation, 594
E1B gene
adenovirus type 12, SV40 vector, monkey cells, 420
Encephalomyocarditis virus
capsid precursor protein in rabbit lysates, 439
protein-RNA interaction, 1048
UV-induced covalent linkages, 1048
Endo-*N*-acetylneuraminidase
in bacteriophages ϕ92 and ϕ1.2, 367
Endonuclease
cap-dependent, influenza virus, 27
env gene
Friend murine leukemia virus, nucleotide sequence, 1
Epithelial cells
polarized, maturation of retroviruses in, 1065
Epstein-Barr virus
activation of latent genomes, 985
HR-1, highly methylated DNA, 482
stimulation of chromosomal protein synthesis, 985
Equine herpesvirus
types 1, 2, 3, genome relatedness, 855
Escherichia coli
anti-pp60^{src} antigen, 462
new phage UC-1, 700
transcription, murine leukemia virus LTR sequence, 456

Feline sarcoma virus
LTR homology to other retroviruses, 466
proviruses containing v-*fes*, 1004
Flat revertants
T antigen expression, 992
transformants reduced by SV40 *tsA* mutants, 992
Friend erythroleukemia cells
DNA-mediated gene transfer, 375
HSV shutoff of protein synthesis, mechanisms, 241
Friend leukemia cells
DNA-mediated gene transfer, 375
Friend murine leukemia virus
envelope gene, nucleotide sequence, 1
env gene, nucleotide sequence, 1
Fujinami sarcoma virus
cytoplasmic localization of transforming protein, 782

gag protein p10
amino-terminal protein sequencing, 885
avian sarcoma and leukemia viruses, 648, 885
Glycoprotein
C of HSV-1, mRNA analyzed, 634
envelope, avian myeloblastosis-associated viruses, 233
released from vesicular stomatitis virus-infected cells, 80
V3 (E) of Japanese encephalitis virus, 124
Gross passage A murine leukemia virus
Leukemogenesis, 539
viral DNA cloned and LTR sequenced, 539

Herpes simplex virus
antigenic variants, by monoclonal antibodies, 672
gene transcription in vivo, 10
mechanisms of shutoff of Friend cell protein synthesis, 241
molecular genetics, 397
thymidine kinase DNA to cotransfect Friend cells, 375
Herpes simplex virus type 1
antigenic variants, by monoclonal antibodies, 672
gene product required for virus DNA encapsidation, 1056
glycoprotein C-encoding genome analyzed, 634
mutant defective in viral DNA release, 397
temperature-sensitive mutants and DNA-binding protein, 354
Herpes simplex virus type 2
DNA-binding protein maturation, 332
monoclonal antibodies for protein identification and gene mapping, 1223
temperature-sensitive mutants and DNA-binding protein, 332, 343
Herpesvirus aotus types 1 and 3
genomes, polypeptides, versus human cytomegalovirus, 715
Host cells
adenovirus type 5 effects on cell cycle, 192
cell fusion and Sindbis virus, 1083, 1090
control of RFM endogenous retrovirus in RFM mouse cells, 47
DNA, sites for mouse mammary tumor proviral DNA, 114
glycoprotein from vesicular stomatitis virus-infected, 80
involvement in Sindbis virus replication, 200
particles from cycloleucine-treated, avian sarcoma virus-infected, 1207
protein synthesis, vesicular stomatitis virus mRNA effects, 206
receptor for mouse mammary tumor virus gene, 140
vesicular stomatitis virus-infected, glycoprotein released, 80
Human α interferon
binding to cells of different sensitivities, 1168
Human polyoma virus JC
genomic structure, 73
infectious DNAs cloned from brain, 299
Hybrid-arrested translation
mapping of parvovirus H-1 genes, 173

"i" leader
adenovirus type 2, RNA segment, 185
Immunoglobulin
complement-dependent mouse antibodies to retrovirus, 956
Influenza virus
defective interfering mRNAs, 55
evolution, 547
mutations in NS genes of field strains, 547
nucleoprotein gene cloned, 434
temperature-sensitive, cap-dependent endonuclease, 27
Interferon
α, binding to cells of different sensitivities, 1168
antiviral effects in three murine cell lines, 1017
effect on mengovirus RNA translation in L-cells, 889
effect on Moloney murine leukemia virus-infected cells, 489
persistence of action in permeabilized cells, 895
5-Iododeoxyuridine
induced mouse cells, murine leukemia virus expression, 755

Japanese encephalitis virus
envelope glycoprotein V3 (E) analyzed, 124
JC virus
DNA replication origin, 73
genomic structure, 73
infectious DNAs cloned from human brain, 299

K_1 killer virus
S. cerevisiae, defective interfering virus mutants, 800

La Crosse virus
RNA compared to snowshoe hare bunyavirus, 1155
structure of small RNA ends, 882
Large T antigen, polyoma virus
homology with SV40 large T antigen, 693
Large T antigen, SV40
divalent cation binding in, 531
homology with polyoma virus large T antigen, 693
phosphorylation sites, 442
phosphorylation sites localized, 315
self-assembly of oligomers, 531
L-cells
interferon-treated, inhibition of mengovirus, 889
protein synthesis inhibited by vesicular stomatitis virus, 618
Leukemia
inbred mice, 755
Long terminal repeat
avian retrovirus *ev*-2, sequence, 868
feline sarcoma virus, homology to retroviruses, 466
Gross passage A murine leukemia virus, sequence, 539
length variation in murine leukemia virus DNA clones, 484
mouse mammary tumor virus, protein coding potential, 941
murine leukemia virus, and *E. coli* transcription, 456
Lymphotropic papovavirus
proteins coded, 872

Marek's disease herpesvirus A
molecular characterization of antigen, 1228
MCF virus
new, xenotropic, 447
type C, two biological classes in inbred mice, 275
MCF 247 virus
murine leukemia, sequence of 3′ end, 291
Measles virus
N,α-tosyl-L-phenylalanine chloromethyl ketone effect on polypeptides, 309
Mengovirus
RNA translation in interferon-treated cells, 889
3′-*O*-Methyl adenosine
inhibition of vaccinia virus, 1164
3′-*O*-Methyl guanosine
inhibition of vaccinia virus, 1164
MH2 virus
subgenomic expression of v-*myc*, 133
Minichromosomes
polyoma virus, DNA products, 585
polyoma virus, poly ADP-ribosylation of chromatin proteins, 600
Mink cell focus-forming virus (MCF)
expression in 5-iododeoxyuridine-induced cells, 755
from Rauscher murine leukemia virus-infected cells, 995
murine leukemia viruses, genome structure, 740
type C, classes distinguished by oligonucleotides, 275
Mink cell focus-inducing virus
new, xenotropic, 447
related proviruses in AKR thymic lymphomas, 576
Mink cells
SV40-transformed, mouse mammary tumor virus expression, 148
Moloney murine leukemia virus
interferon effects on infected cells, 489
morphogenetic block of mutant *ts*3, 1140
nonviremic mouse Mov substrains, 505
RNA-deficient particles in interferon-treated cells, 489
Moloney murine sarcoma virus
genealogy, 607
P85 polyprotein in *ts*110-infected cells, 1177, 1183
recombinational junctions of v-*mos* in variants, 607
v-*mos*-encoded proteins in transformed cells, 1177
Monoclonal antibodies
against avian retrovirus reverse transcriptase, 859
against rotaviruses, 1143
for antigenic variants of HSV-1, 672
to Rous sarcoma virus $pp60^{src}$, 1190
to two HSV-2 glycoproteins, for identification and mapping, 1223
use for analysis of Japanese encephalitis virus glycoprotein, 124
Mosquito cells
Sindbis virus replication, 792
Mouse chromosome 16
mouse mammary tumor virus gene mapped, 140

Mouse mammary tumor virus
cellular receptor and gene mapping, 140
endogenous proviral DNA in mouse tumors, 114
expression in SV40-transformed mink cells, 148
glucocorticoid-dependent DNA expression, 148
LTR, protein coding potential, 941
mRNA
defective interfering, influenza virus, 55
HSV-1, encoding glycoprotein C, 634
vesicular stomatitis virus, effect on host cell protein synthesis, 206
Murine leukemia virus
cloned DNA from Gross passage A virus, 539
expression after 5-iododeoxyuridine induction of cells, 755
LTR sequence and *E. coli* transcription, 456
MCF 247, sequence of 3′ end, 291
mink cell focus-forming, induced, genome, 740
mink cell focus-inducing, related proviruses, 576
new mink cell focus-inducing virus, 447
nonexpressed, activation by DNA transfection, 950
radiation-induced, new class, 565
WN1802N, recombinant DNA clones, 484
xenotropic, new virus derived from, 447
xenotropic, proviral DNA in mouse genomes, 473
Murine sarcoma virus
P85 polyprotein in *ts*110-infected cells, 1177, 1183
v-*mos*-encoded proteins in transformed cell lines, 1177

Newcastle disease virus
temperature-sensitive mutants, thermostability, 18
NIH 3T3 cells
Moloney murine leukemia virus-infected, interferon effects, 489
RNA-deficient virus in interferon-treated, 489
NS genes
influenza virus, mutations in, 547
Nucleocapsid protein
vesicular stomatitis virus gene coding for, 773

p10
fifth major avian viral *gag* protein, 648, 885
P85
polyprotein encoded by Moloney murine sarcoma virus, 1177, 1183
Papovavirus, lymphotropic
proteins coded, 872
Parvovirus
porcine, purification and antigenic properties, 842
rabbit, proteins analyzed, 627
Parvovirus H-1
nucleotide sequence and gene mapping, 173
Picornavirus
two Theiler's groups with similar nucleotides, 1150
Plasmid pACYC184
tetracycline gene, SV40 promoters, 478
Poly(ADP-ribose) polymerase
poly ADP-ribosylation of polyoma virus minichromosomes, 600
Polyhedrin
A. californica nuclear polyhedrosis virus-infected cells, 215

Polyoma virus
infectivity-loss mutation in large T antigen, 693
large T antigen with homology to that of SV40, 693
minichromosomes, in vitro DNA products, 585
minichromosomes, poly ADP-ribosylation of chromatin proteins, 600
Porcine parvovirus
purification and antigenic properties, 842
pp60^{src}
antiserum produced with *E. coli* antigen, 462
Rous sarcoma virus, monoclonal antibody, 1190
proto-amv DNA
clones from leukemic chicken DNA library, 925

Rabbit parvovirus
structural and nonstructural proteins, 627
Radiation leukemia viruses
new class from radiation-induced thymomas of mice, 565
Rat cells
transformation by adenovirus 12 *cyt* mutants, 1107
Rauscher murine leukemia virus
glycoproteins gp69 and gp71, 995
new glycosylated *gag* gene product, 1200
new viruses from infected JSL-V9 cells, 995
Rauscher spleen focus-forming virus
genetic structure, 1217
Reticuloendotheliosis virus
c-*rel*, cellular homolog to v-*rel* oncogene, 104
Retrovirus
basolateral maturation in polarized epithelial cells, 1065
ecotropic, neurotropic, cloning of DNA, 1159
RFM strain, control in RFM mouse cells, 47
type C, strain RFM, 47
wild mouse, cloning of infectious viral DNA, 1159
Retrovirus, mouse
neutralizing capacity of antibodies, 956
Retrovirus, type C
new, gene product of, 914
RFM endogenous retrovirus
control in RFM mouse cells, 47
Rotavirus
neutralizing monoclonal antibodies, 1143
Rous-associated virus-0
compared to avian retrovirus *ev*-2, 868
Rous sarcoma virus
inactive *src* gene product from point mutation, 1211
monoclonal antibody to protein pp60^{src}, 1190
Prague C, reverse transcriptases, 727
site-directed mutagenesis, 1211

Saccharomyces cerevisiae
K_1 killer virus, defective interfering mutants, 800
Salmonella typhimurium
DNA restriction systems and bacteriophages, 1147
Sendai virus
3′ termini in defective interfering RNAs, 659

Simian virus 40
agnoprotein, subcellular localization, 428
divalent cation binding in large T antigen, 531
DNA cotransfected with HSV DNA, 375
large T antigen phosphorylation sites localized, 315
large T antigens, self-assembly of oligomers, 531
nascent late transcripts, 5′ termini, 264
new complementation group *G*, 36
phosphorylation sites in large T antigen, 442
promoters and tetracycline resistance in pACYC184, 478
protein LP-1 defining new complementation group, 36
recombinants with adenovirus type 5, 91
recombinants with adenovirus type 12 E1A gene, 408
recombinants with adenovirus type 12 E1B gene, 420
super T antigen from SV40-transformed cells, 1098
transformants induced by *tsA* mutants, 992
transformed mink cells, 148
vector for influenza virus nucleoprotein gene, 434
Sindbis virus
cell fusion at low pH, 1090
envelope protein conformation at low pH, 1090
host cell involvement in viral replication, 200
polycaryocyte formation mediated by, 1083
proteins mediating cell fusion, 1083
replication in *Aedes albopictus* culture, 792
Snowshoe hare bunyavirus
RNA compared to La Crosse bunyavirus, 1155
Super T antigen
activities, 901
from SV40-transformed cells, properties, 1098

Temperature-sensitive mutants
Newcastle disease virus, 18
12-*O*-Tetradecanoyl-phorbol-13-acetate (TPA)
inducer of Epstein-Barr virus gene expression, 985
Theiler's murine encephalomyelitis virus
proteins specified in tissue culture, 496
same 5′-end nucleotides in two isolates, 1150
Thymidine kinase
polypeptide in vaccinia virus, 62
N,α-Tosyl-L-phenylalanine chloromethyl ketone (TPCK)
effect on measles virus polypeptides, 309

Vaccinia virus
growth and virus-specific RNA synthesis inhibited, 1164
inhibition by methylated nucleoside analogs, 1164
protein synthesis inhibitor solubilized from virions, 452
thymidine kinase and other genes, 62
Vesicular stomatitis virus
defective interfering particle, recombination event, 766
glycoprotein from virus-infected cells, 80
inhibition of L-cell protein synthesis, 618
nucleocapsid protein gene, expression, 773
nucleocapsids, cell-free synthesis and assembly, 155
viral mRNA inhibition of host cell protein synthesis, 206
v-*mos* sequence
junctions in Moloney murine sarcoma viruses, 607
v-*myc* gene
subgenomic expression in MH2 virus, 133

Western equine encephalitis virus
structural proteins, 708
